

Digitally Transforming

Schools with Lily

What we think

Experts in providing solutions for the Education Industry.

Working with over 10 schools, we have provided a host of solutions to improve the learning experience of students, as well as the day-to-day running of schools.

We are constantly updating our digital transformation eco-system and ensure we can provide the following services for your organisation:

**The opportunity to
save money**

**Keeping your systems
and procedures
future-proof**

**Protecting your
students and data
online**

One of our happy clients:

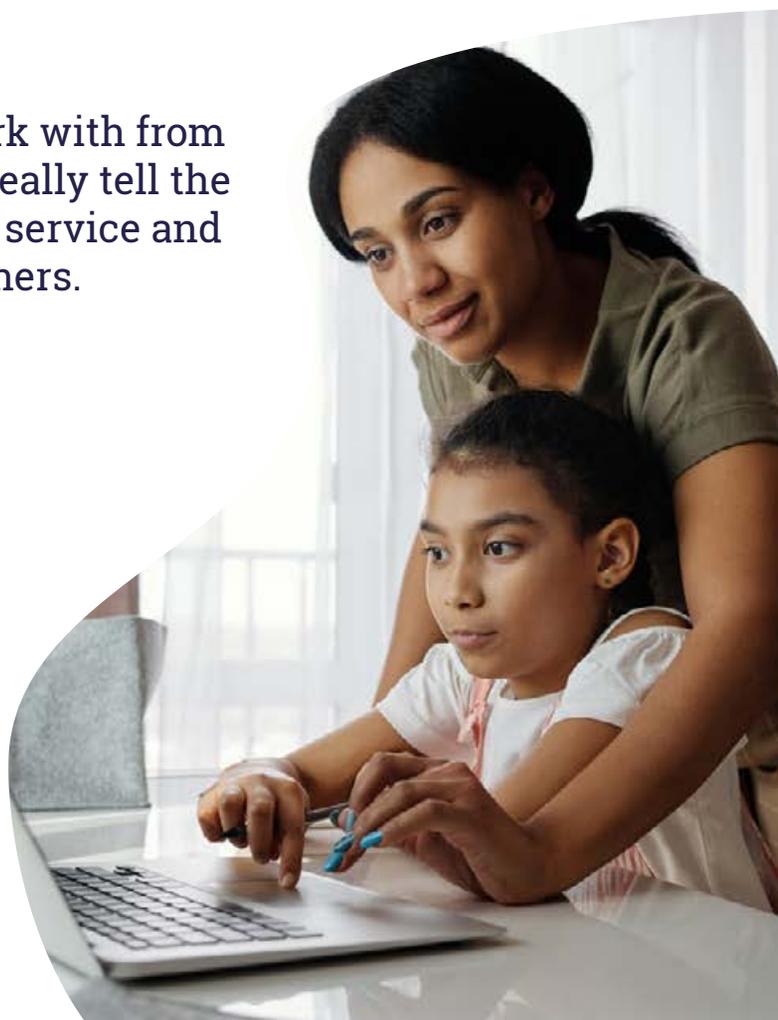

Lily have been a great company to work with from setup to day-to-day support. You can really tell the company prides itself on its customer service and the relationship it builds with its partners.

Everyone I've dealt with really cares.

Microsoft Teams

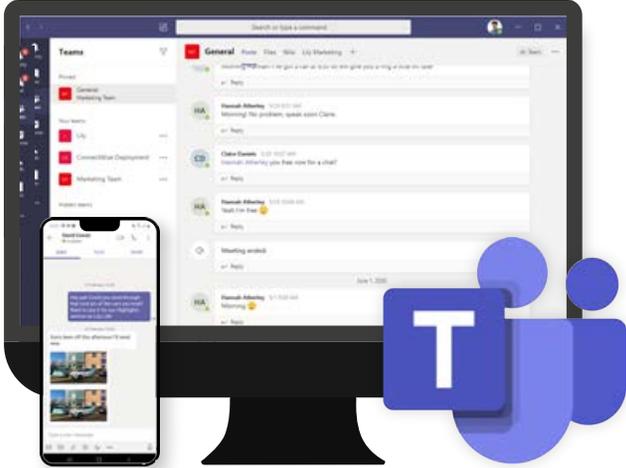

The ultimate solution for remote learning and collaboration.

For unmatched internal communication between staff and students, Microsoft Teams is here to provide you with the ultimate collaboration experience.

With a secure network, your shared files and access to your channels is kept private and uncompromised keeping your students safe from possible classroom hijackings by strangers.

Designed for remote working in mind, teams can be accessed on desktop, mobile and tablet devices giving teachers and students the flexibility to learn and communicate in the way they want.

Using just one login per user, classes and messages can be accessed at the school premise, or at home in case of another lockdown meaning no matter the circumstances, your school can continue to teach the future generation.

Create groups for separate classrooms, teacher meetings, study sessions and even after-school virtual activities. Admins can add or remove users manually or set rooms to be public to your private network.

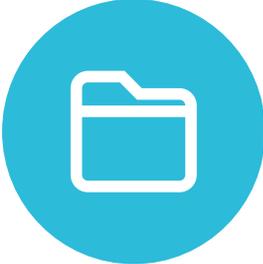

Share files such as video, audio, imagery and documents for effective studying and engaging lessons.

Features of Microsoft Teams:

Instant Messaging

Share Files

Video Conferencing

Telephony

Screen Share

Dial-In

Staying safe online

Keep students and teachers safe whilst using the web.

Protecting organisations is a top priority for us at Lily. With our mobile content filtering service, students can safely browse the internet and stay focused in learning. Take control of your connectivity and protect your devices and data, all whilst meeting internet compliance regulations.

Using strict browsing filters, students can stay away from harmful content online, and with fully customisable filtering that can be scheduled at set times, we can prevent students from abusing connectivity during lunchtime or afterschool.

Features of Mobile Content Filtering:

Choose exactly what you want students to access on the Internet and when

Create granular lists of URLs and keywords you want to block and allow

Add policies that grant access by users, groups, or even time of day

Keep your mobile devices secure.

Our Mobile Content Filtering gives mobile devices an extra layer of security using intelligent A.I. that scans websites flagged with malicious content and prevents access.

It even moves harmful URL's to a block list so your students and staff can stay safe, lowering the risk of unintentionally visiting a website that hosts malware, viruses, and phishing scams.

Stay productive and on task.

To ensure students are not getting sidetracked, distracting sites such as social media, games, streaming sites and more are blocked at network level, meaning your data is only used for it's intended purpose.

To save your data further, we can block websites that are known to use excessive of data unexpected overages.

- **Completely customisable Internet filtering**
- **Compatible with all mobile devices**
- **Real-time reporting**
- **Intelligent content analysis**

On-Premise Phones

Cost-effective and reliable communications.

At Lily, we have a range of award-winning on-premise phone systems to suit your business. From hybrid phone systems that enjoy the benefits of both on-premise and hosted, to cost effective and reliable communications platforms.

Upgrade your communications with leading-edge technology from leaders in the telecommunications industry.

Features of our systems:

Voicemail to Email – Forget about the annoying process of going through your voicemails one-by-one using your handset. With our phones, voicemails can be recorded and sent automatically to an email address of your choice.

Auto-Attendant & Music-On-Hold – We can configure an auto-attendant service with our systems as well as Music-On-Hold without having you having to purchase a separate piece of software for integration.

Practical Handsets – Our handsets are easy to use, and with so many models to choose from you can find the perfect one to fit your needs and budget.

Status Monitoring – See the status of users on our communications platform. You will see if they are currently in a meeting, away from desk, on break and more.

Integration for Total Flexibility- Our On-Prem phones can integrate with standard office applications to make sure your communications and processes are truly integrated.

We often provide our customers with a hybrid solution that allows them to use their analogue line whilst accessing all the features of the cloud, combining voice, video and data into one simple system.

Hosted VoIP Solutions

Take your communications to the cloud.

With Lily Cloud, you can have a communication platform that is as mobile as you are.

Whether you are on site at your school, working from home or travelling, you can stay connected and continue communication internally with staff or externally seamlessly, all through our award-winning Lily Cloud platform.

Features of our Lily Cloud:

Just One Number – Whether you are using the mobile or desktop client, you will have the same number across both meaning you can provide the same level of service.

Managed For You – With a hosted system, we host your communications over our secure data servers and handle all maintenance, meaning all you need to worry about is using it!

Disaster Recovery – In case of disaster that limits access to your school (such as a lockdown), you can continue your communication as normal and deliver the same call experience with little training as Lily Cloud clients have a universal interface across different devices.

Full On-Premise Functionality – Features such as Voicemail to Email, Call Recording and Reporting, Auto-Attendant and more are all supported on Lily Cloud

Fully Remote – As it's cloud-based, you can login to the platform in any location with an internet connection, we also provide 4G Mi-Fi kits that you can use as optional to be fully remote.

Hardware as a Service

Breaking down the cost of your hardware.

Keep your staff and students up-to-date with our cost-effective Hardware as a Service plans. Breakdown the cost of your hardware monthly and choose from our various packages to suit your needs the best.

Whether it is a desktop PC to handle the basics, or a high-end laptop to keep up with your needs, we have the perfect package for you.

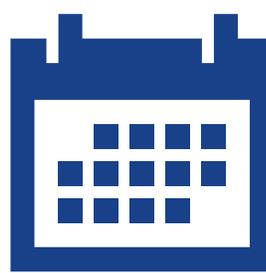

Benefits of HaaS from Lily:

Leading brands available such as Microsoft, HP and Lenovo

The most up to date operating system

Spread the cost of equipment

Innovative technology

Take your communications to the cloud.

Our HaaS devices all come with MendIT Insurance as standard, designed to cover accidental damage, theft and loss across your mobile device estate.

The easy online process makes it simple to claim and their fully trained and accredited engineers, MendIT aim to have your equipment either repaired, or replaced and returned to you within the shortest time possible.

**Mend-IT
next day
repair

- **Accidental Damage - Physical and Liquid**
- **Optional Theft Cover***
- **£0 and £50 Excess Plans**
- **Courier Collection and Delivery**
- **Up to 3 years Instant Cover**
- **Easy Online Claims**

Connectivity

Future-proof your broadband.

In 2025, the ISDN and PTSN network are set to be switched off, with BT moving their whole network over to IP.

Why be forced to switch late, when you can experience next-generation speeds and cut unnecessary costs for your school using SoGEA?

Introducing the next generation.

SoGEA (Single Order Generic Ethernet Access) is here to provide you with superfast broadband without the need for a traditional phone line installation, meaning costs fall!

Delivering the same speeds as FTTC broadband, SoGEA uses the same tried-and-tested infrastructure meaning it benefits from the same geographic availability.

Cut Costs

Speeds of up to 80Mbps

For Homeworking

Futureproof Connection

Fast Installation

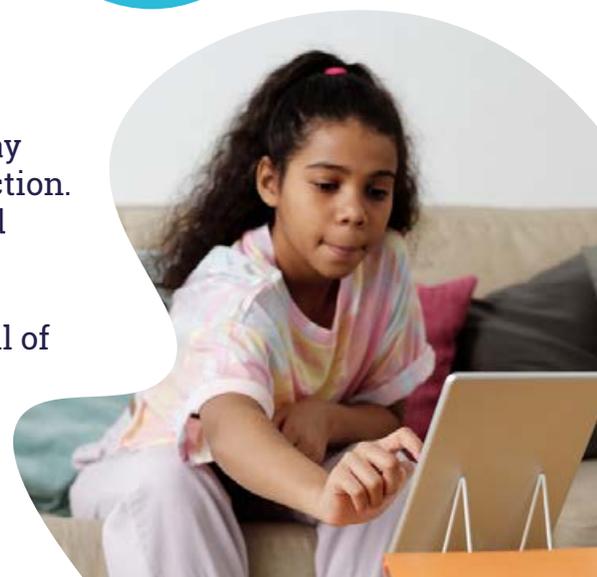

No phone line needed

Mobile Wi-Fi.

When working at home, sometimes students or teachers may not be able to learn effectively due to a poor internet connection. We can fix this and get them engaging in online lessons and research with little lag using our 4G mobile Wi-Fi kits.

Whether it is on a laptop, tablet, desktop or mobile device, all of them are supported by the MiFi device guaranteeing a fast, dedicated connection.

Save on Energy

Save up to 40% on your energy bill with Lily Energy.

With access to the whole of market, we can secure the best energy provider for your premise based on costs and your needs.

Our access to the whole of market includes the big 6 suppliers and means we can offer some of the most competitive business energy solutions in the industry.

Quick and easy process.

We will compare business energy prices for you and let you know if you could be saving money.

We can provide this service for free, simply get in touch with us and our Business Energy Experts will be in touch to take a look at your current bills and show you firsthand how much you could be saving.

What our business energy service include:

- **Free and unbiased service:** Whether you need to obtain a quick business energy tariff quote or pricing for a large multi-site tender, we never charge for our service.
- **Time & Cost Savings:** With a pool of over 20 energy supply partners, we can compare business energy prices and find the best tariff options to suit your school needs and lower your costs.
- **Management of process:** Using a signed Letter of Authority, we can contact suppliers on your behalf, taking away much of the hassle associated with this process.
- **Dedicated account manager:** Our account managers specialise in business energy solutions and will help you with query resolution, bill validation, contract termination, direct debit queries and enquiries and energy budget management, plus so much more.

Compare business energy prices today and see how much you could save!
